Remarks: characterizing alder thicket interlaced with seeps, drainageways, and streams. as a whole, this community is a mosaic of wetlands, waters, and uplands. see SW12_T29_V12 for description and photos of R3UB stream, and SW12_T29_14 for wetland seep. multiple transects through community yielded 47 wetland/water and 74 upland points

VEGETATION - Use scientific names of plants. List all species in the plot.
