Remarks: photo time 1630. #s 1476-80. hgwsl. lac fringe at beaver pond. water level appears low - area surrounding beaver lodge mostly mud. willow area upslope of hgwsl nearly identical to willows sampled at previous beaver pond - ample standing water, several deeply incised channels, seeps, overall saturated but w areas of standing/flowing water

VEGETATION - Use scientific names of plants. List all species in the plot.
