## WETLAND DETERMINATION DATA FORM - Alaska Region

| Project/Site: Susitna-Watana Hydroelectric Project  | Borough/City:    | Denali Borough               | Sampling Date: 06-Aug | -13  |  |  |
|---|------------------|------------------------------|-----------------------|------|--|--|
| Applicant/Owner: Alaska Energy Authority  |                  | Sampling                     | g Point: SW13_T16     | 5_02 |  |  |
| Investigator(s): CTS, AMD   | Landform (hillsi | de, terrace, hummocks etc.): | Flat                  |      |  |  |
| Local relief (concave, convex, none): flat  | Slope: 1.0       | % / 0.6 ° Elevation: 664     |                       |      |  |  |
| Subregion : Interior Alaska Mountains Lat.:   | 63.39221096      | Long.: -148.5028060          | 67 Datum: Wo          | GS84 |  |  |
| Soil Map Unit Name:   |                  | NWI classif                  | ication: Upland       |      |  |  |
| Are climatic/hydrologic conditions on the site typical for this time of year? Yes  No  (If no, explain in Remarks.)   Are Vegetation , Soil , or Hydrology significantly disturbed? Are "Normal Circumstances" present? Yes  No    Are Vegetation , Soil , or Hydrology naturally problematic? (If needed, explain any answers in Remarks.) |                  |                              |                       |      |  |  |
| SUMMARY OF FINDINGS - Attach site map showing sampling point locations, transects, important features, etc.   |                  |                              |                       |      |  |  |
