US Army Corps of Engineers Alaska Version 2.0

SOIL Sampling Point: SW13_T133_02

Donth	Profile Description: (Describe to the depth needed to do Depth Matrix		ded to docume	ocument the indicator or confirm the absence of indicators) Redox Features					
(inches)	Color (mois	t)	%	Color (moist)	%	Type ¹	Loc 2	Texture	Remarks
0-4			100					Fibric Organics	
4-6			100					Hemic Organics	
6-10		2/2	100					Sandy Loam	organic staining throughout
									. ————
¹Type: C=Con	centration. D=[Depletion. F	RM=Reduced	l Matrix ² Locatio	n: PL=Pore L	ining. RC=	Root Cha	nnel. M=Matrix	
Hydric Soil In	ndicators:		:	Indicators for P	roblematic H	lydric Soi	ils: ³		
Histosol or Histel (A1)				Alaska Color C	Change (TA4)	ł		Alaska Gleyed Without H	ue 5Y or Redder
Histic Epipe	edon (A2)		[Alaska Alpine	swales (TA5)			Underlying Layer	
Hydrogen S	Sulfide (A4)		[Alaska Redox	With 2.5Y Hue	е		Other (Explain in Remar	ks)
Thick Dark	Surface (A12)			3.0 :	د الد رما ما ما د				andrala an
