

Purpose of Photo: AL SU195 is located above a flat, elliptical sandy island located upriver of Watana Creek. The purpose of this AL is to collect photography that could be used to create photosimulations of the proposed reservoir at a height of 2050 feet. Photos were taken on the west end of the island looking downriver. AL SU195 is situated at same location and direction as SU117; however photography was collected on a clear day to exhibit mountain views, particularly Denali, that are afforded during clear weather.

Analysis Location: SU195 – Susitna River Inundation Zone RM 197.5	Centered Cardinal Direction: West
	Type of Camera / Lens: Nikon D4 / 50mm
	Photo Date: 7/22/13
Photographer: L Kling / E Whiteman	Time of Day: 14:13
